Applicants should possess the following essential criteria:

- A First Degree in Computer Science/Engineering or related discipline.
- Certifications in Microsoft server and database technologies.
- Good analytical, problem solving, human relations and communication skills.
- Solid understanding of PC based business systems/architecture and electronics.
- Familiarity with Cloud technologies and ITIL principles.
- Knowledge of Microsoft SQL 2012/ 2016.
- Knowledge of Database Architecture and operations.
- Experience with Microsoft SQL Reporting Services (SSRS) & SQL Server Integration Services (SSIS) is desired.
- Working knowledge of data warehousing and business reporting needs is required.
- Understanding of database structures, theories, principles, and practices is required.
- Working technical experience with designing, building, installing, configuring, and supporting database servers, [SQL Server, MS SQL] is required.
- Working knowledge of IT security mechanisms.
- Theoretical and practical knowledge of electrical circuitry.
- Excellent knowledge of network protection and PC security systems.
- Good knowledge of physical supporting computing infrastructure such as UPS, printers, SANs.
- Working knowledge of network architecture and automated network monitoring applications.
- Excellent knowledge of Active Directory, Windows Server operating systems and advanced Windows based systems configurations (clustering, virtualization, networking etc.).
- Familiarity with networking technologies (wired, cellular and other wireless).
- Familiarity with infrastructure-based services including email, network access, data protection procedures and internet access provisioning and protection.
- Minimum of five (5) years' demonstrated experience in similar capacity.
- A reliable motor vehicle.
